

Divya Angelina

185 Kent St, Blacksburg, VA 24061 | divyaangelina@vt.edu | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science student at Virginia Tech with experience building web applications, desktop software, and machine learning projects. Experienced in Python, JavaScript, React, and Git, with a background in product development, workflow automation, and user-focused software design.

EDUCATION

Virginia Tech *B.S. Computer Science, Minors in Finance and Viticulture* May 2028

SKILLS

Programming Languages: Python, Java, C++, JavaScript, HTML, CSS
Frameworks & Libraries: React, Vite, PySide6, python-chess, Scikit-learn, Pandas, NumPy
Tools & Platforms: Git, Linux, MySQL, Google Colab, VS Code, Chrome DevTools
Concepts: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning

EXPERIENCE

Director of Data & Web Design Aug 2026 – Present
Hokie Activities Board, Virginia Tech Blacksburg, VA

- Administered HAB's website, GobblerConnect event listings, and survey infrastructure to maintain accurate content across platforms
- Analyzed event attendance and survey datasets to identify engagement trends and evaluate program performance
- Partnered with the Vice President of Communications to develop reports and improve data-driven communication strategies

Director of Partnerships Aug 2026 – Present
Innovate Living Learning Community, Virginia Tech Blacksburg, VA

- Developed partnerships with APEX, the Entrepreneurship Club, and campus organizations to expand student engagement
- Represented Innovate at Pamplin Student Engagement Board meetings and campus-wide initiatives
- Served as Innovate's Giving Day Ambassador, coordinating outreach to strengthen community engagement

Co-Founder & Front-End Developer Mar 2025 – Present
Art in Progress Blacksburg, VA

- Conducted customer discovery interviews with 16 artists to validate product assumptions and inform MVP development
- Gathered feedback from 20+ prospective users on the initial website, using findings to refine product direction and user experience
- Designed and developed a responsive React landing page while collaborating with co-founder to define MVP requirements and prioritize features

Teaching Assistant Aug 2025 – May 2026
Pamplin College of Business, Virginia Tech Blacksburg, VA

- Facilitated in-class activities and discussions for 70+ students in MGT 2064: Foundations of Entrepreneurship
- Delivered weekly office hours and provided 1:1 academic mentorship to support student comprehension and performance
- Assisted faculty with grading, assessment design, and Canvas course content management

Data and Operations Intern Jul 2024 – Aug 2025
The CollegeSource Bangalore, KA

- Automated Google Drive workflows in Google Colab, reducing folder setup time from 30 minutes to 10 seconds
- Guided 40+ high school students through college applications, providing structured feedback and tracking student data in Excel
- Authored 10+ instructional guides on college applications and financial aid, improving access to application resources

PROJECTS

Art in Progress: Startup Website
React • JavaScript • HTML • CSS • Vite • Git

- Developing a responsive startup website using React, JavaScript, HTML/CSS, and Vite, focusing on scalable frontend architecture
- Architecting reusable React components to support iterative feature development and maintainable UI design
- Collaborating with co-founder through Git-based version control to implement and refine product requirements

Isolani: A Desktop Chess Application
Python • PySide6 • python-chess • Minimax • Alpha-Beta Pruning • Object-Oriented Programming

- Developed a chess application in Python with a Minimax AI opponent and Alpha-Beta pruning across configurable difficulty levels
- Designed modular architecture separating GUI, game engine, and game logic to improve maintainability and support future features
- Built an interactive PySide6 interface with custom board rendering, responsive UI components, and real-time gameplay

Farming the Future: Climate-Resilient Crop Prediction
Python • Scikit-learn • Pandas • NumPy • Machine Learning • Time Series Forecasting

- Analyzed 10,000+ temperature observations across 4 major Indian cities using Python, Pandas, and NumPy to identify climate-resilient crop recommendations
- Developed regression and time-series forecasting models to project 25-year temperature trends
- Evaluated multi-city climate datasets to identify regional patterns and inform crop resilience recommendations
